

## SIZES GUIDE

### OUR FITS

To help users make their choice, we have developed 5 different fits, each of which corresponds to a specific morphology. In addition to the technical specificities inserts, fabric and style, fit is an important factor for the user. Each product therefore has a pictogram which classifies it according to fit.

#### REGULAR **FIT**

Straight and classic fit. This standard fit is generally used for the Discovery category.

There are products for the road to drive in all circumstances.

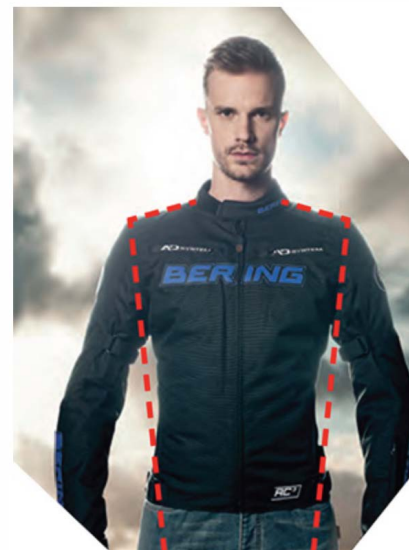

#### BODY **FIT**

Close fit, mainly used for Pulse or Racing products.

#### ATHLETIC **FIT**

Comfort fit, developed for large statures to create a casual look. Developed in partnership with countries such as Australia or Brazil where statures are larger than in Europe.

Fit for generous morphologies, for men and women. Each product is the result of specific trials carried out in partnership with motorcyclists with unusual physiques. Measurements are adjusted for the waist, arms and thighs. Bering was the first to develop a range for generous physiques.
